DETAILED ACTION

1. Claims 1-26 are pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-17 and 19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 7, "the buyer" lacks antecedent basis.

Claims 3, 4, 10, 11, line 2 of each, "the limits" lacks antecedent basis.

Claim 9, line 3, "the Internet" lacks antecedent basis.

Claim 17, line 1, "the steps" lacks antecedent basis.

Claim 19, line 5, "the outer limits" lacks antecedent basis.

Claim 20, line 3, "the Internet" lacks antecedent basis.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/426,063

Art Unit: 2167

Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Conklin et al., US Patent No. 6,338,050; Conklin et al., US Patent No. 6,336,105; Conklin et al., US Patent No. 6,332,135 or Conklin et al., US Patent No. 6,141,653.

To provide the terms and conditions each Conklin reference to include at least one of a product and service or different offering criteria for each Conklin reference would have been obvious to one of ordinary skill in the art. Doing so would bundle the goods and services that is common knowledge in the business transaction world into one package providing a more streamlined business offering. It is noted that Conklin uses a web server. To provide an algorithm for matching a buyer and seller would have been obvious to one of ordinary skill in the art. Doing so would use common knowledge to facilitate a mechanism for a sale between buyer and seller.

- 5. Applicant's Information Disclosure Statement regarding Walker et al., US Patent No. 5,897,620, has been reviewed. See enclosed PTO-1449.
- 6. Further material references of interest:

Richard et al., US Patent No. 6,289,348, discloses a computer network communicating with a host server using a roster database.

O'Neil et al., US Patent No. 6,219,653, discloses a product calculation system using computer means.

Grosh et al., US Patent No. 6,195,646, discloses a pricing module using a computer system.

Art Unit: 2167

Rickard et al., US Patent No. 6,112,189, discloses a computer negotiated system.

Barni et al., US Patent No. 6,064,981, discloses an on-line display of negotiating goods.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Joseph Rudy whose telephone number is 703-308-7808. The examiner can normally be reached on Tuesday through Friday, 8am to 6pm.

The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-7239 for regular communications and 703-746-7239 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
